WEEE-notice

The WEEE (Waste Electrical and Electronic Equipment)-directive, which became effective as European law on February 13th 2003, resulted in an all out change in the disposal of disused electro devices. The primarily purpose of this directive is the avoidance of electrical waste (WEEE) and at the same time the support of recycling and other forms of recycling in order to reduce waste. The WEEE-logo on the device and the package indicates that the device should not be disposed in the normal household garbage. You are responsible for taking the disused electrical and electronical devices to a respective collecting point. A separated collection and reasonable recycling of your electrical waste helps handling the natural resources more economical. Furthermore recycling of electrical waste is a contribution to keep the environment and thus also the health of men. Further information about disposal of electrical and electronical waste, recycling and the collection points are available in local organizations, waste management enterprises, in specialized trade and the producer of the device.

- Follow the cap color code to place the wires into the cap slot. Keep the pairs twisted as possible as you can and cut off the surplus wires.
- Folgen Sie der Farbmarkierung um die einzelnen Adern in die Abdeckkappe einzulegen. Behalten Sie die Verdrillung soweit wie möglich bei und schneiden Sie die überschüssigen Adern ab.

- Follow the color sign to put the cap onto the IDC.
- Orientieren Sie sich an den Farbmarkierungen, und setzen die Kappe in den Stecker ein.
