# Delock Professional USB Condenser Microphone Set for Podcasting and Gaming

## Description

This professional USB condenser microphone by Delock can be used for high-quality voice and vocal recordings.

### Optimal recordings
The microphone has a 16 mm condenser and a cardioid polar pattern (unidirectional) and therefore ideally captures the sound. Due to high power, low self-noise and precise performance, even the finest sounds are recorded crystal clear.

### Dual Layer Pop Filter & Windscreen
Due to the included dual layer pop filter and the windscreen, the recording quality is further optimized. Annoying wind noises are optimally filtered.

### High sampling rate
Typical USB microphones work with 16 Bit and 44 KHz. The Delock microphone offers a sampling rate of 24 Bit and 192 kHz, so it is possible to record in Hi-Fi studio quality.

### Plug & Play
Due to USB Plug & Play the microphone is ready to use immediately, no driver installation is needed. The microphone works with all common operating systems such as Windows, Mac OS, Chrome OS and Linux.

### Stable & adjustable stand
The stand ensures that the microphone is stable on the table. With the telescopic function, the microphone can be adjusted to the preferred height.
