

Delock Audio Splitter USB Type-A to 2 x stereo jack female metal

Description

This Audio Splitter by Delock allows the connection of two audio output devices, such as headphones or speakers, to a device with a USB Type-A socket. The audio signal is transmitted in stereo to both output devices, e.g. two people can listen to the same music at the same time.

Thanks to the integrated chipset, the audio signals are transmitted in crystal-clear Hi-Res sound quality.
